SUMMARY

Full Stack Development refers to the process of designing and building both the front-end (client-side) and back-end (server-side) components of a web application. A Full Stack Developer is skilled in various technologies used in developing a complete web application, including user interface design, server logic, database management, and API integration.

Front-End: Involves technologies like HTML, CSS, and JavaScript, along with frameworks like React, Angular, or Vue.js, to create responsive and interactive user interfaces.

Back-End: Focuses on server-side logic using languages like Node.js, Python, Java, or PHP, and frameworks such as Express.js, Django, or Spring. It also includes working with databases like MySQL, MongoDB, or PostgreSQL.

Key Skills:

- HTML/CSS/JavaScript
- Front-end frameworks (e.g., React, Angular)
- Back-end technologies (e.g., Node.js, Django)
- Databases (SQL and NoSQL)
- RESTful APIs and web services
- Version control (e.g., Git)
